

Dissecting Aerial 2022 Covid Safety Protocols

To keep everyone safe, we ask everyone in attendance at Dissecting Aerial 2022 to comply with the following Covid safety protocols:

- Read the pre-attendance questionnaire that is emailed to you once you have booked, complete and return to info@gravity-levity.net before the start of the event
- Take a lateral flow test (LFT) every 3 days from 7 Jan 2022 until attending the symposium. The final test needs to be taken within 24 hours prior to arrival.
- For any positive lateral flow tests during this window, please immediately get a PCR test. This must have a negative result for you to be able to attend.
- Daily temperature tests on entry to the building
- Confirm there is no change to your answers to the pre-attendance Covid questionnaire on each day of attendance.
- An isolation area will be marked off inside the venue for anyone presenting with symptoms or a high temperature and LFT tests available here.
- It is a requirement for everyone to wear a face mask for the duration of the symposium (unless you are exempt or presenting). Please bring one with you.
- Facemasks and sanitiser will be available at the venue
- Social distancing will be observed for all practical sessions according to Government guidelines.

If at any point you feel uncomfortable with the measures being taken, or feel that they don't go far enough - please do let us know - your safety and well-being are paramount.

For those of you unfamiliar with the building, the presentations will take place on stage and additionally make use of the large auditorium space which has an efficient air handling/refreshing system plus, we have a low number of in-person attendees (10 as of Sat 8th Jan).

Finally, if you feel you are unable to comply with any of the above or feel uncomfortable about in person attendance at this time, we would be happy to discuss you switching to an online ticket.
